FREE CHLORINE SENSOR
A420-FCL

A420-FCL-H1.PNG

Introduction

A420-FCL Free Chlorine Sensor is an excellent choice for continuous measurement of free (or residual) chlorine in swimming pools, spas, industrial applications, or dirty/colored samples where colorimetric methods are inadequate. This electrode utilizes 2-electrode amperometric measurement technology and the measured chlorine concentration is compensated by an internal temperature sensor. Analog output 4-20mA allow easily integrate into any Monitoring or Control systems.

- i Affordable, complete, free chlorine electrode system;
- i Long life with replaceable membrane and refillable electrolyte;
- i Auto temperature-compensated output;
- i 1/2" NPT fittings for easy installation in pipe or our available flow cell;
- i Factory calibrated, no zero calibration required;
- i Analog 4-20mA output;
- i Plug & Play.

Typical Applications

A420-FCL can be used to monitor or control the residual chlorine in:

- i Swimming pools;
- i SPAs;
- i Industrial Process;
- i Municipal Water;
- i ...
