Introduction

A420-FCL Free Chlorine Sensor is an excellent choice for continuous measurement of free (or residual) chlorine in swimming pools, spas, industrial applications, or dirty/colored samples where colorimetric methods are inadequate. This electrode utilizes 2-electrode amperometric measurement technology and the measured chlorine concentration is compensated by an internal temperature sensor. Analog output 4-20mA allow easily integrate into any Monitoring or Control systems.

- 1 Affordable, complete, free chlorine electrode system;
- 1 Long life with replaceable membrane and refillable electrolyte;
- 1 Auto temperature-compensated output;
- 1 1/2" NPT fittings for easy installation in pipe or our available flow cell;
- 1 Factory calibrated, no zero calibration required;
- 1 Analog 4-20mA output;
- 1 Plug & Play.

Typical Applications

A420-FCL can be used to monitor or control the residual chlorine in:

- 1 Swimming pools;
- 1 SPAs;
- 1 Industrial Process;
- 1 Municipal Water;
- 1 ...
