Process Flat pH Sensor H087

SKU: H087

Doc No: H087-DS-EN-10

Introduction

H087 is a popular general purpose in-line (continuous measurement) electrode offering affordable, flat sensor application coverage for many water applications such as drinking water, industrial water, aquaculture, tank installations or related applications. The flat surface sensor is often referred to as "self-cleaning" when installed in a process stream since the water flow has a tendency to "shear off" biofouling and other debris from the sensor surface.

- 1 3/4" NPT threads on both front & back;
- 1 Flat surface sensor with "self-cleaning" properties;
- 1 Built-in temperature sensor Pt100.

Typical applications

- 1 Drinking water;
- 1 Waste water;
- 1 Industrial water;
- 1 Aquaculture;
- 1 Agriculture;
- 1 Hydroponic;
- 1 Soil pH measurement.
