## Introduction

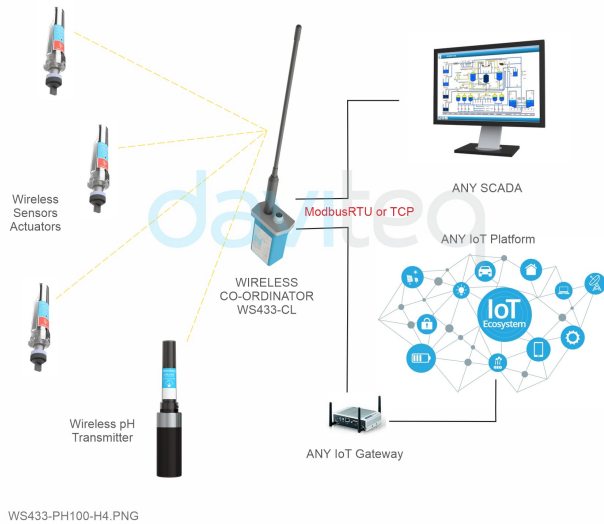

WS433-PH100 is a wireless pH transmitter, it can connect to any standard pH sensor, with or without temperature sensor. It can support various kinds of temperature sensor like Pt100, Pt1000, Thermistor... The transmitter can be configured with fixed temperature compensation or automatic temperature compensation. It will connect 2-way wirelessly to the wireless co-ordinator WS433-CL to send data and receive the configuration. It can be configured the operation parameters like data sending interval, health check cycle... remotely from Globiots platform or via ModbusRTU software (thru the WS433-CL). Its default data rate is 50 kbps, can be switched to 625 bps to increase the communication range. The sensor can last up to 10 years with 1 x AA battery.

- 1 BNC connector for pH sensor;
