2. Supports

2.1 Support via Help center:

For support, please contact our support center at the following link:

<https://support.daviteq.com/hc/en-us>

If you have any questions about the product, you can search for information on that page.

If you can't find the right information, please register an account and send us a request. We will respond within 24 hours.

Our support engineer will contact you via the Ticket system. If the product needs to be sent back to the factory for warranty, we will generate an RMA code so you can send it back to us. To follow the status of the RMA process, customers can visit our SypportSync system as below.

2.2 Return products for warranty:

Customers can visit the below link and register an account to follow your RMA for product returns.

Instruction to update the firmware for Seismic Sensor

1. Preparation

1. A J-link firmware update cable tool
2. An updated firmware of the sensor on the PC for flashing to the sensor.
3. A computer run on Windows 7 or higher
4. A SEGGER FLASHER software to update the firmware: Download the software at below link, click the installation file and click **Next** button to install the software to the PC.

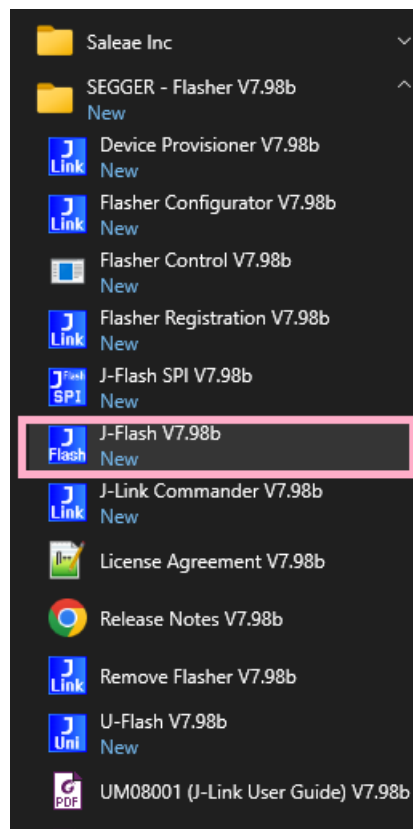

Software link: https://www.segger.com/downloads/flasher/Flasher_Windows_x86_64.exe

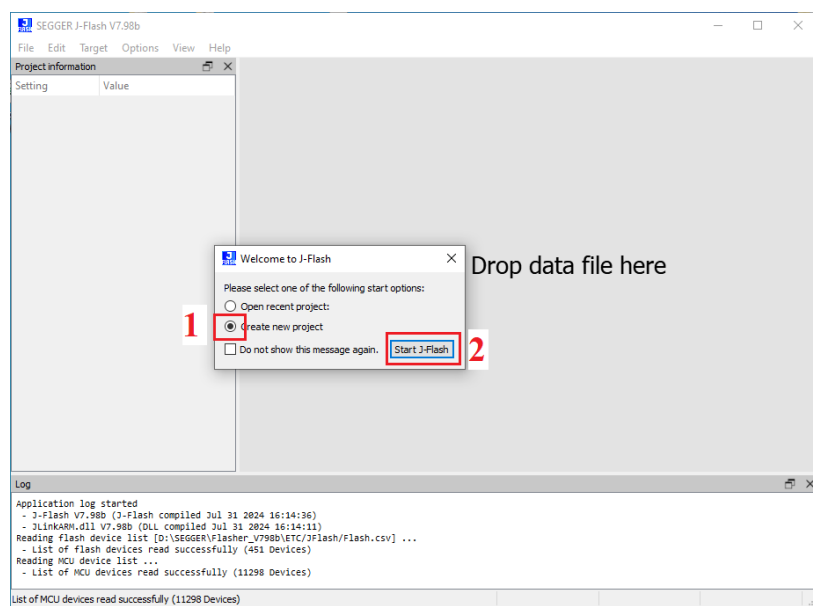

If the PC run on other operating systems, please download a relevant SEGGER FLASHER software at link: <https://www.segger.com/downloads/jlink/>

2. Update the firmware

Open "Start" menu on Window operating system, find "SEGGER Flasher V7.xxx", click "J-Flash V7.xxx" to open

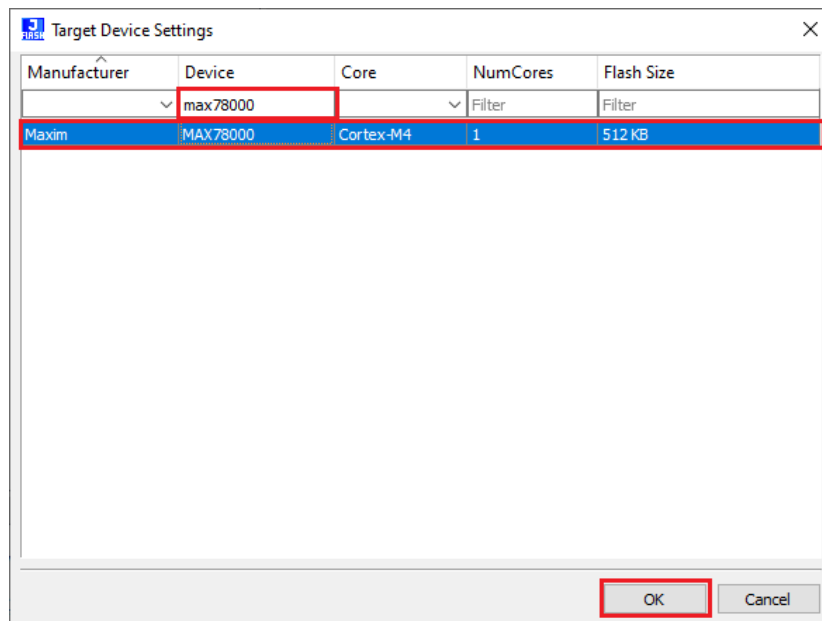

Tick to select **Create new project**, click **Start J-Flash** button

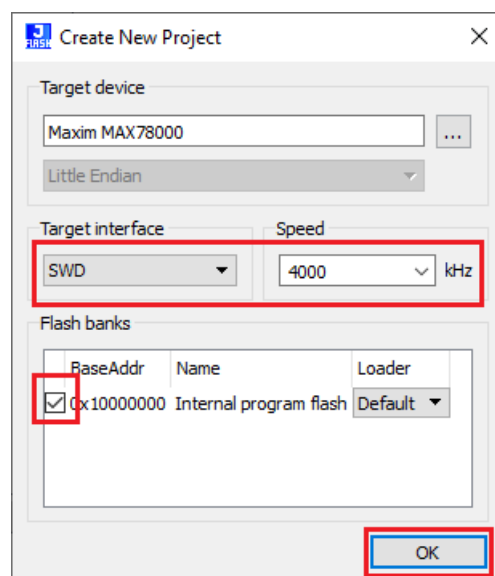

Click browser icon

Find with Device **max78000** , click to choose and Click**OK**

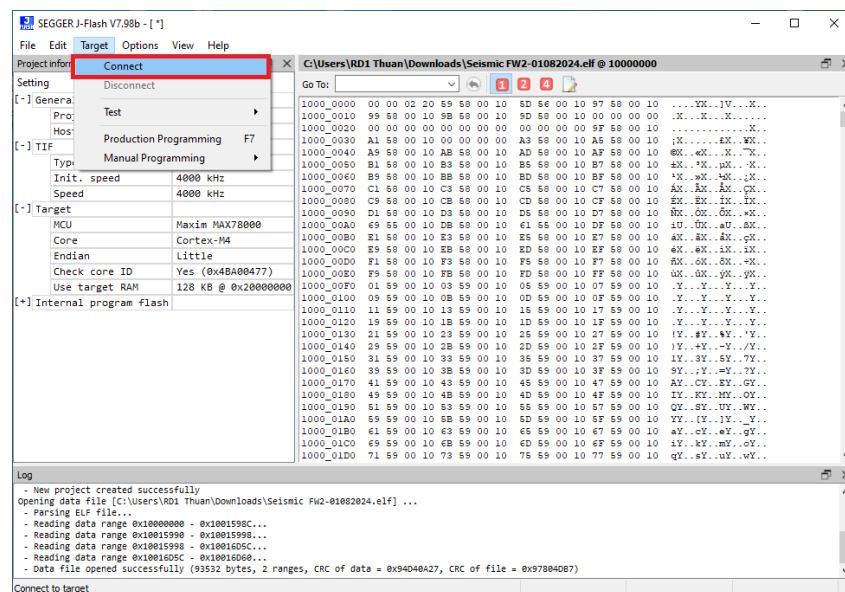

Select speed **400 kHz**, and tick **0x10000000 Internal program flash**, then click **OK**

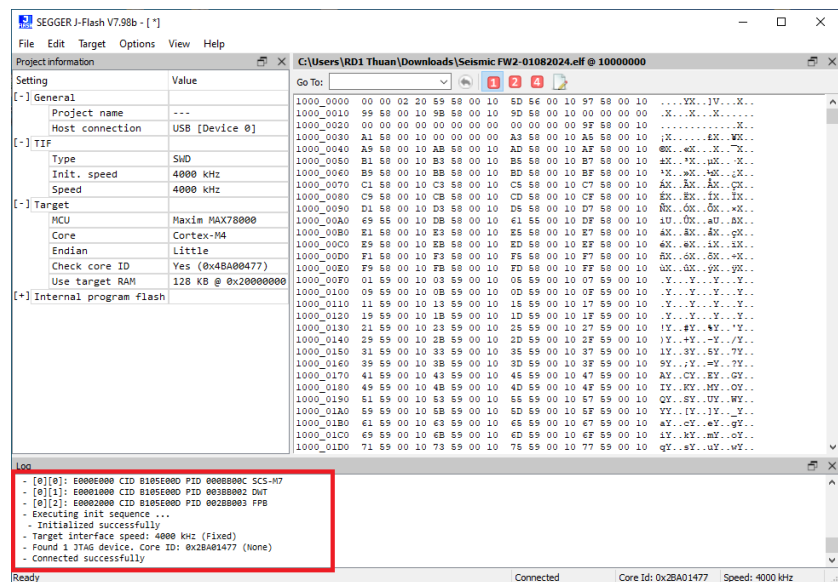

Connect the firmware update cable tool to the PC and the sensor

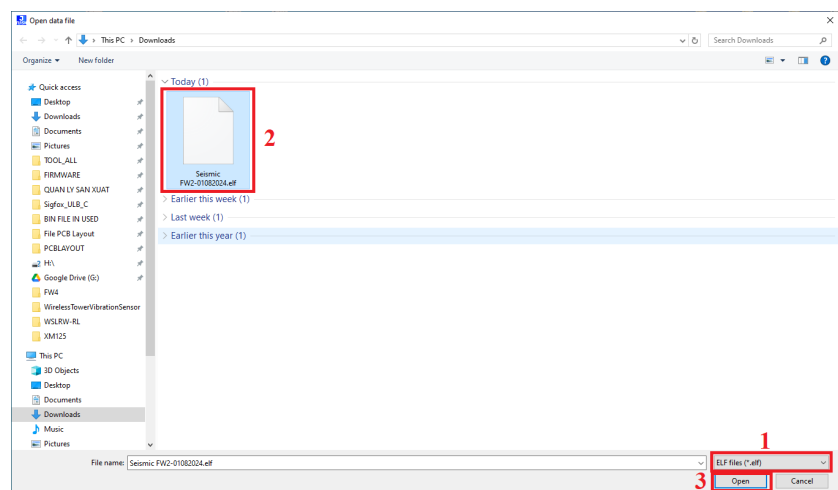

Select **Target** menu then click **Connect**

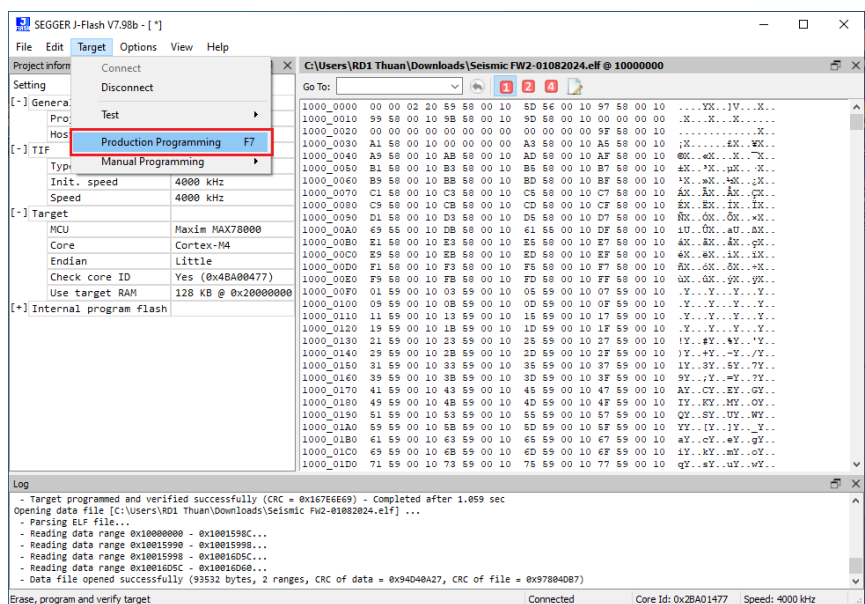

The software will inform the successful connection

Click **File** menu, click **Open data file**, browse to the firmware file on the PC, select **.elf** file type, select the firmware file, then click **Open** button

Select **Target** menu, click **Production Programming** to start to update the firmware

After that the software will notify the popup of the successful update
